Data-Driven Analysis of User Behavior and Conversion Funnel

Prepared by:

Oshri Tasama

Yitzhak Chekola

Miki Avraham

Mentor:

Danny Zilberberg

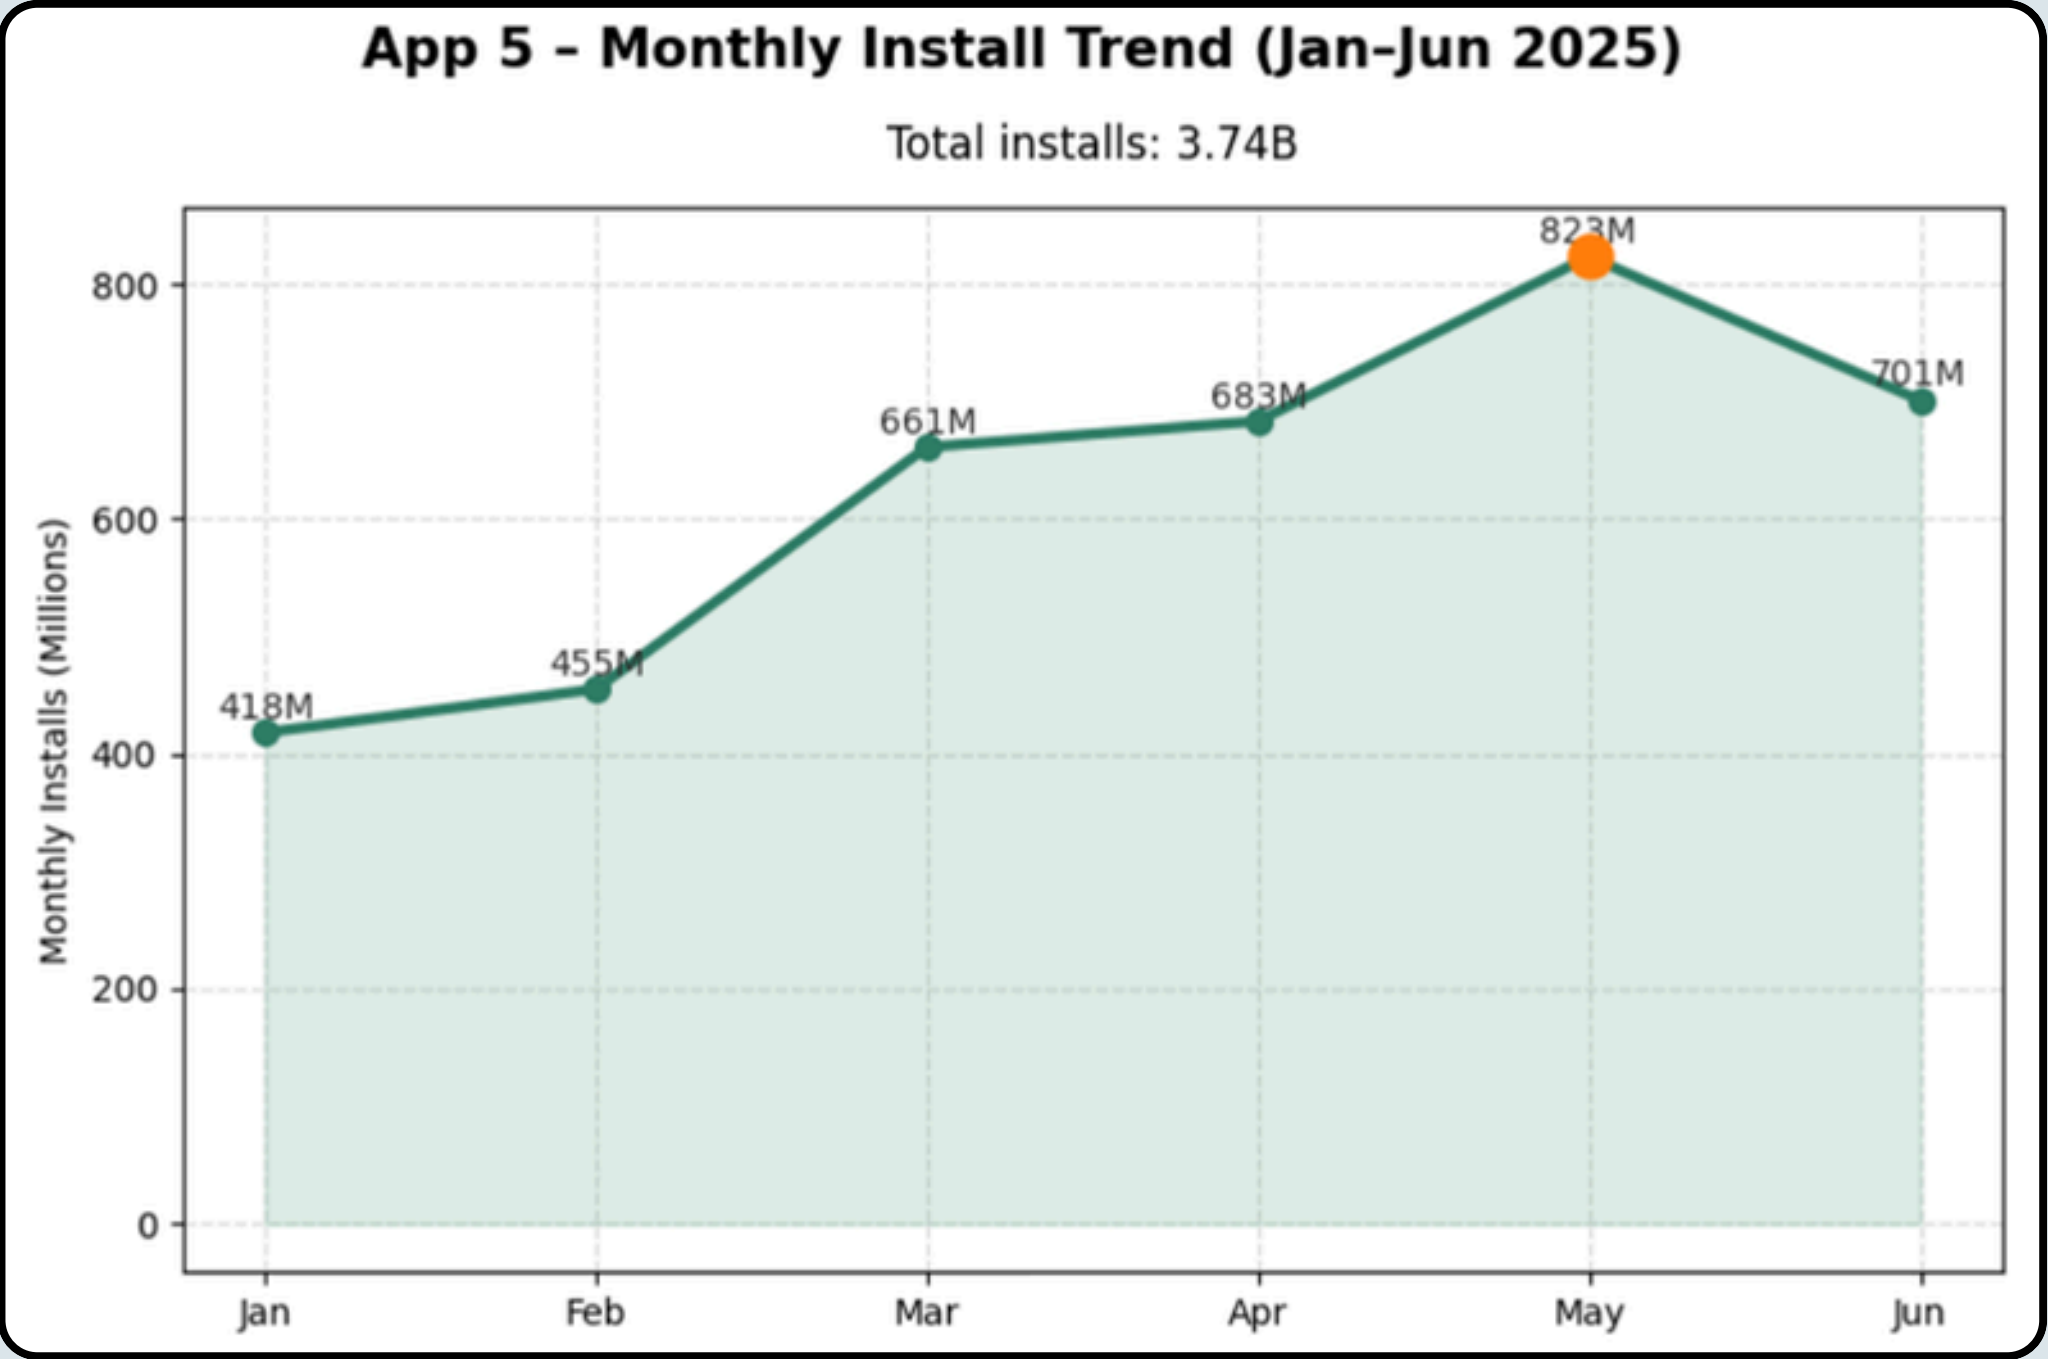

Project Background

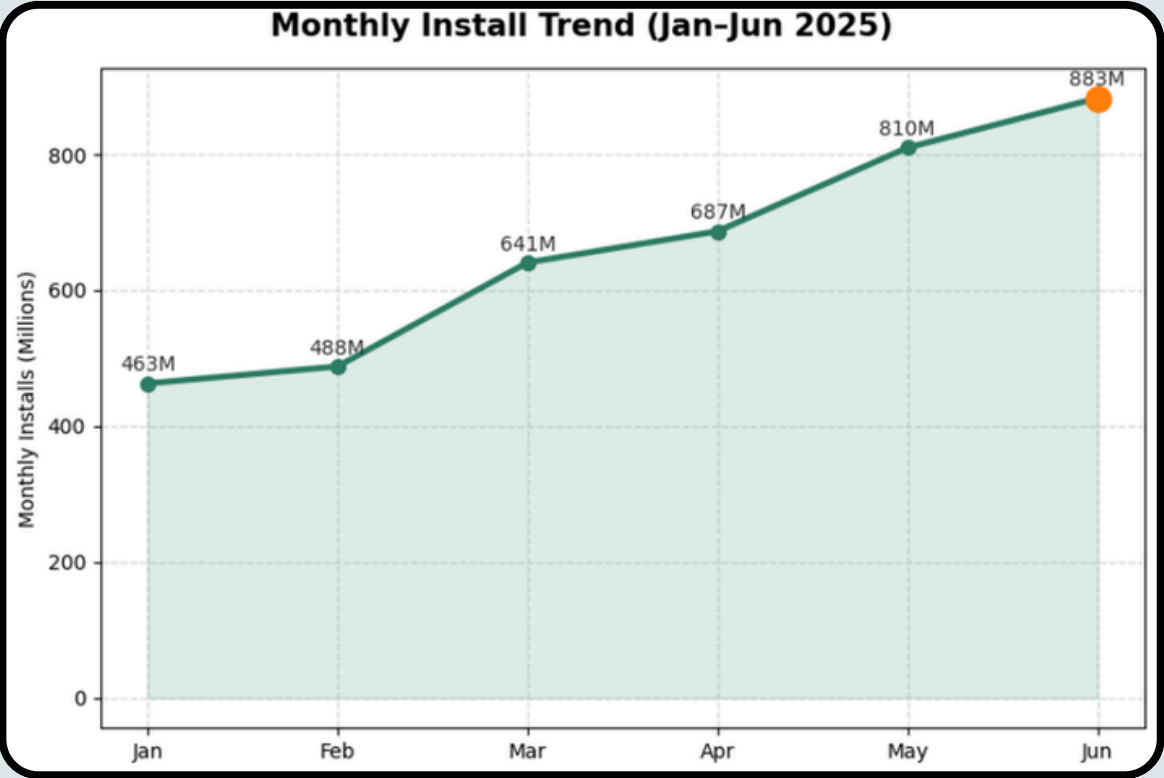

- Scope of analysis: focused exclusively on App 5.
- Large-scale **E-commerce app** with significant install growth.
- Installs are mainly driven by paid acquisition, with broad geographic reach.
- High post-install activity, but a significant gap between app usage and actual purchases.

Initial App Snapshot - Overall Install Scale

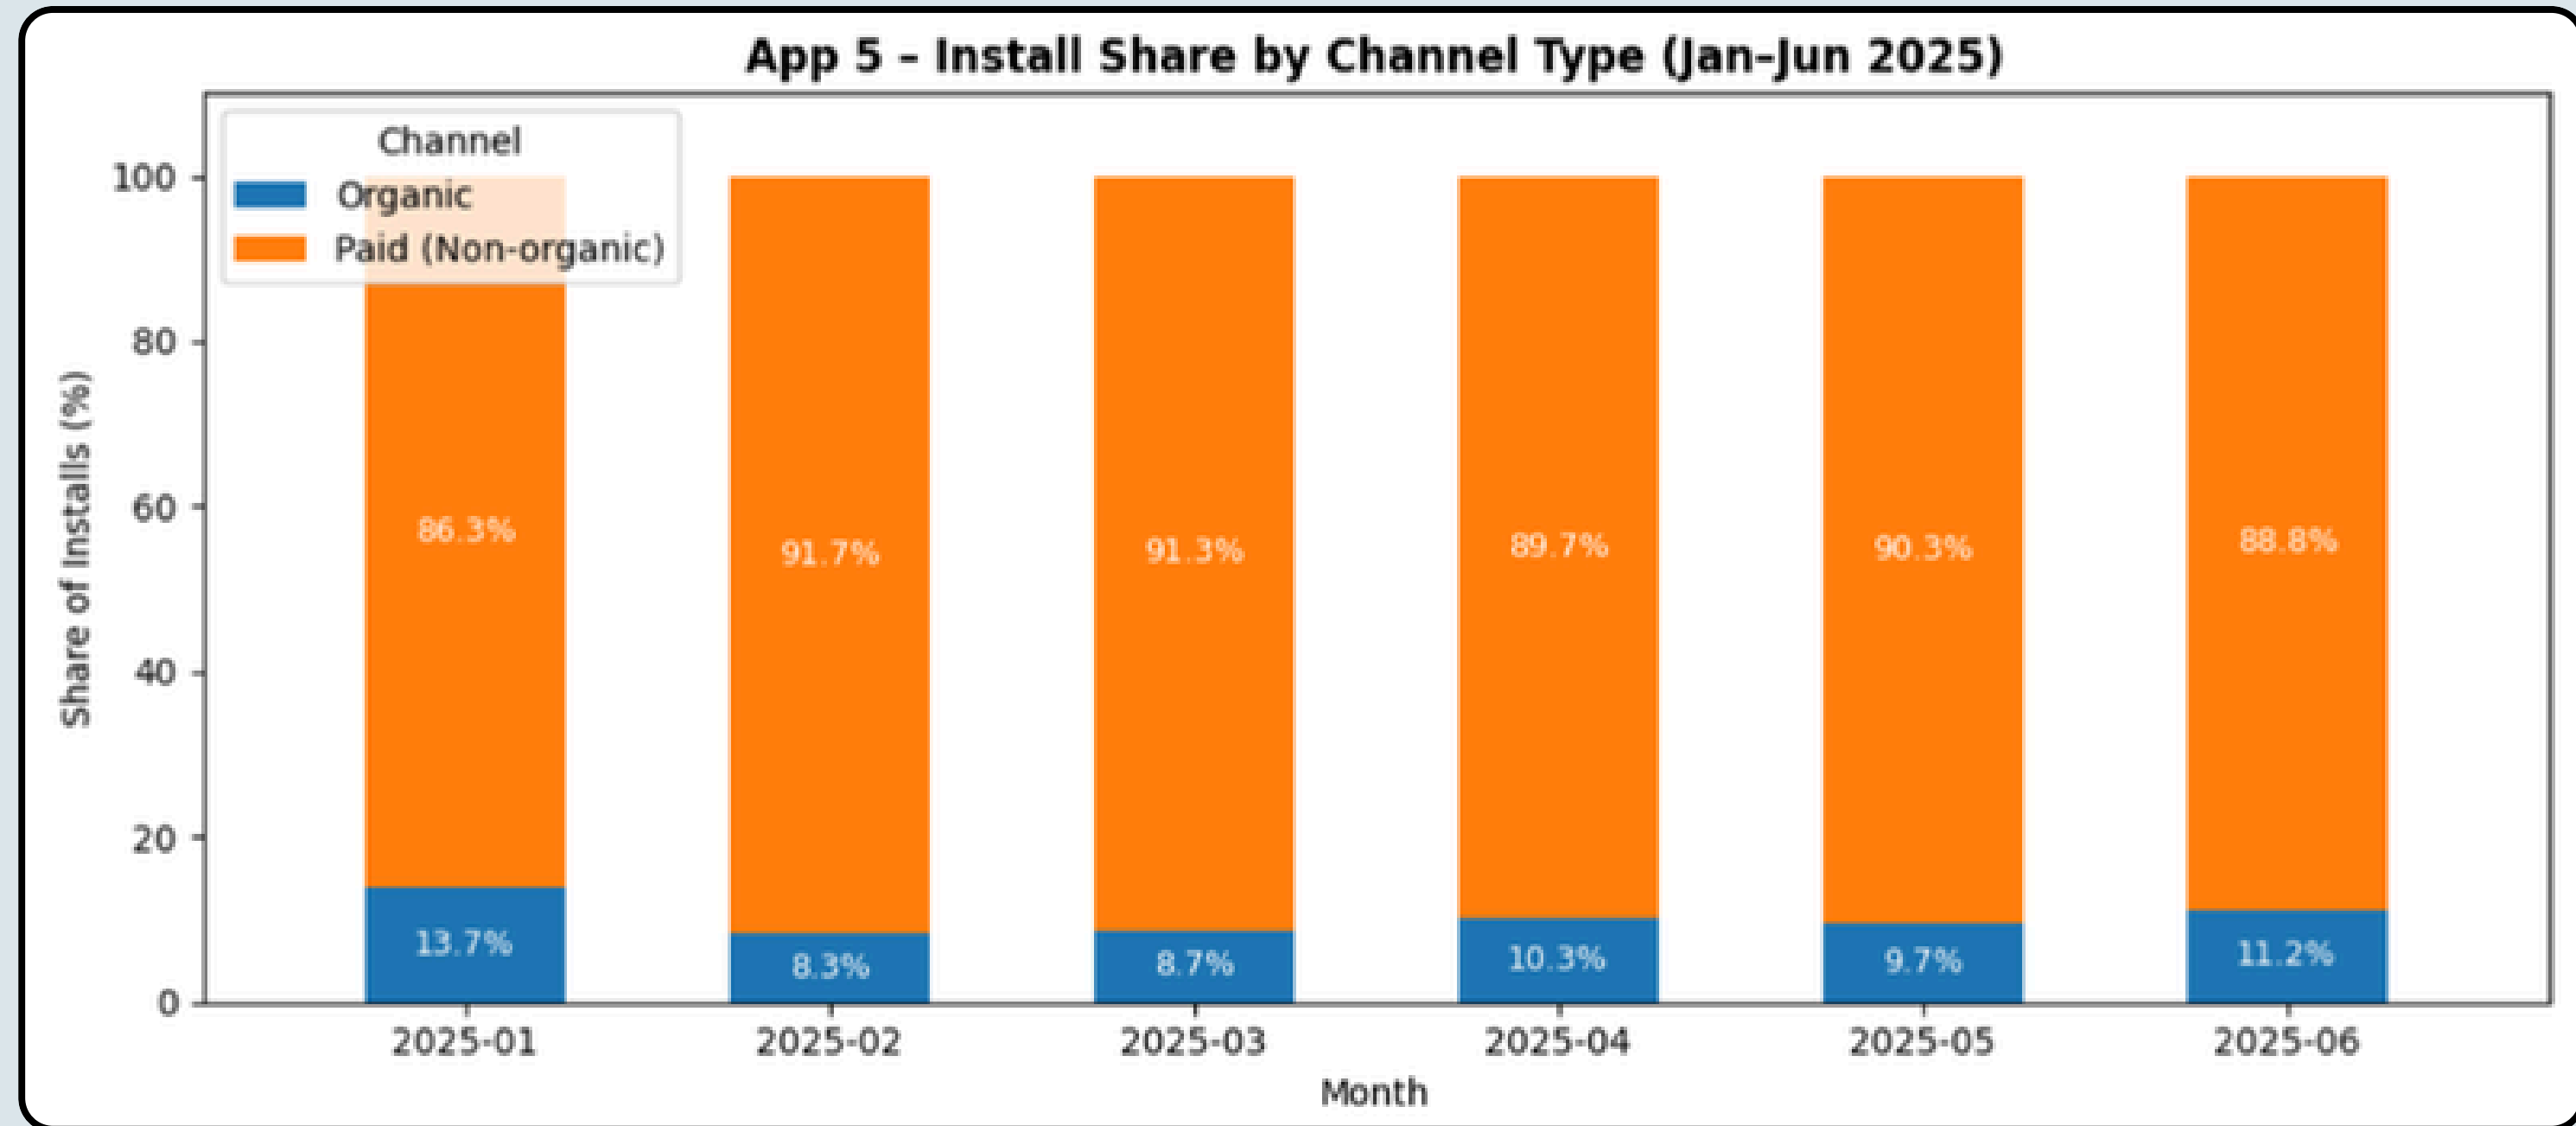

Benchmark Comparison

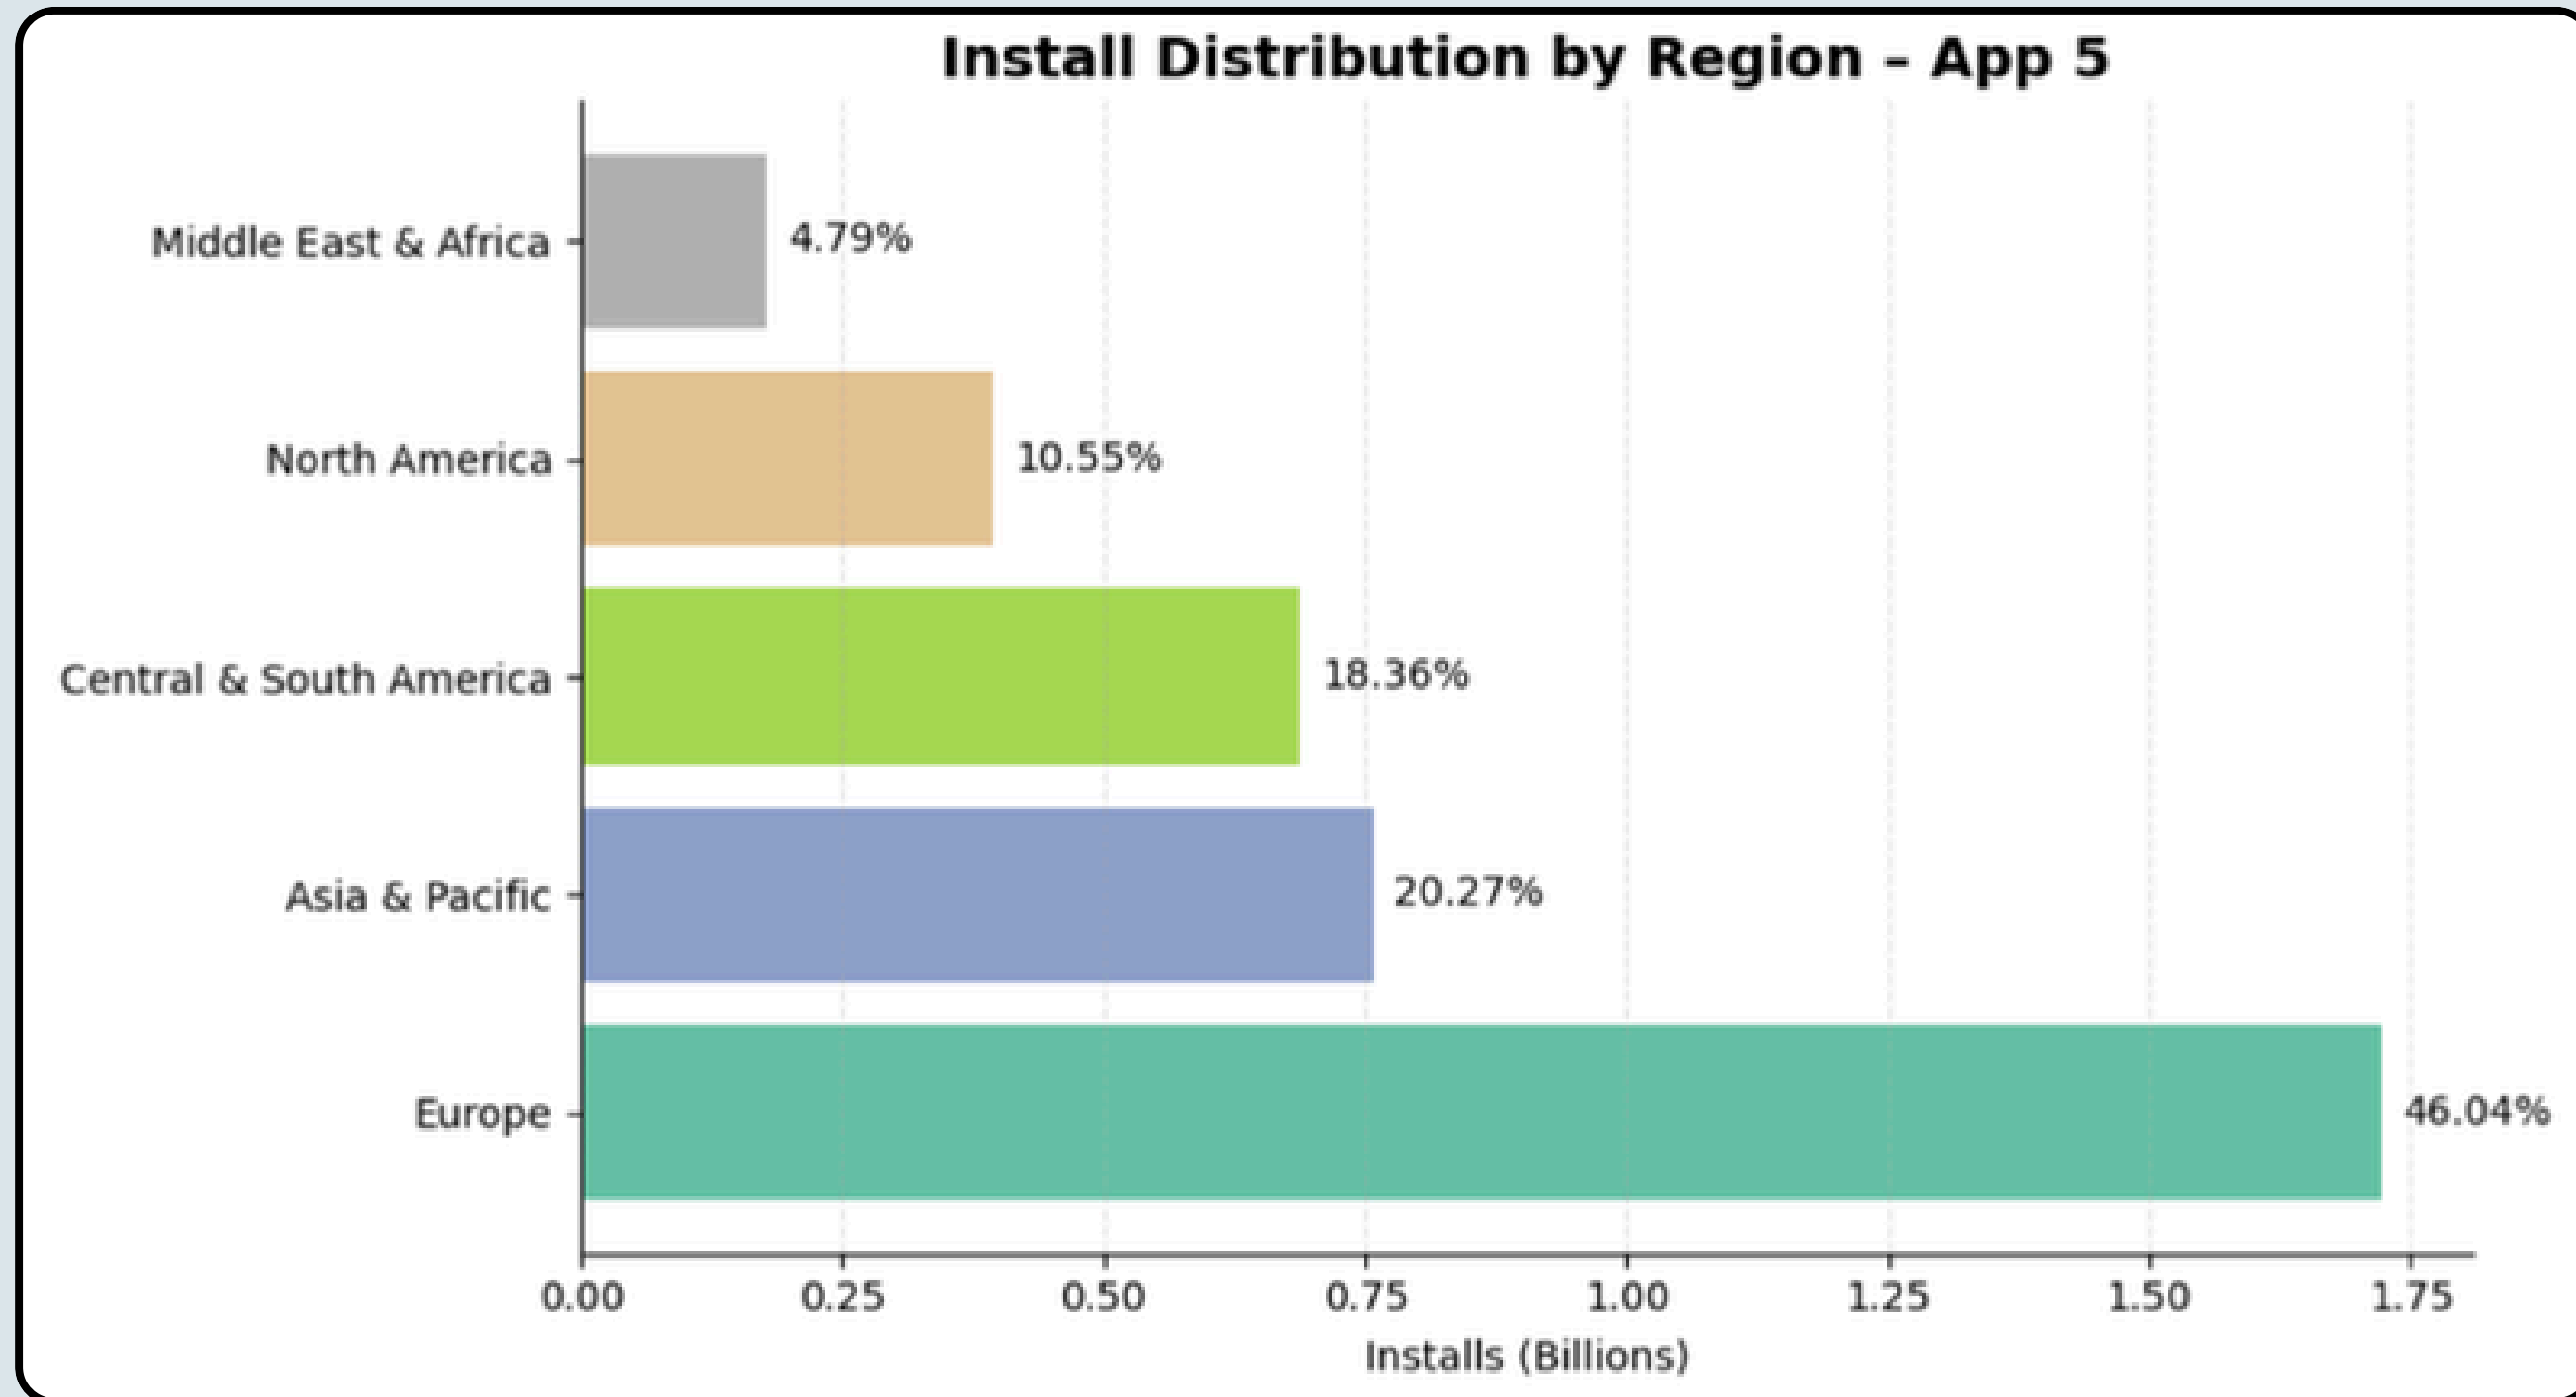

App 5 - Current Performance Snapshot (Jan-Jun 2025)

Initial App Snapshot - Install Acquisition Mix

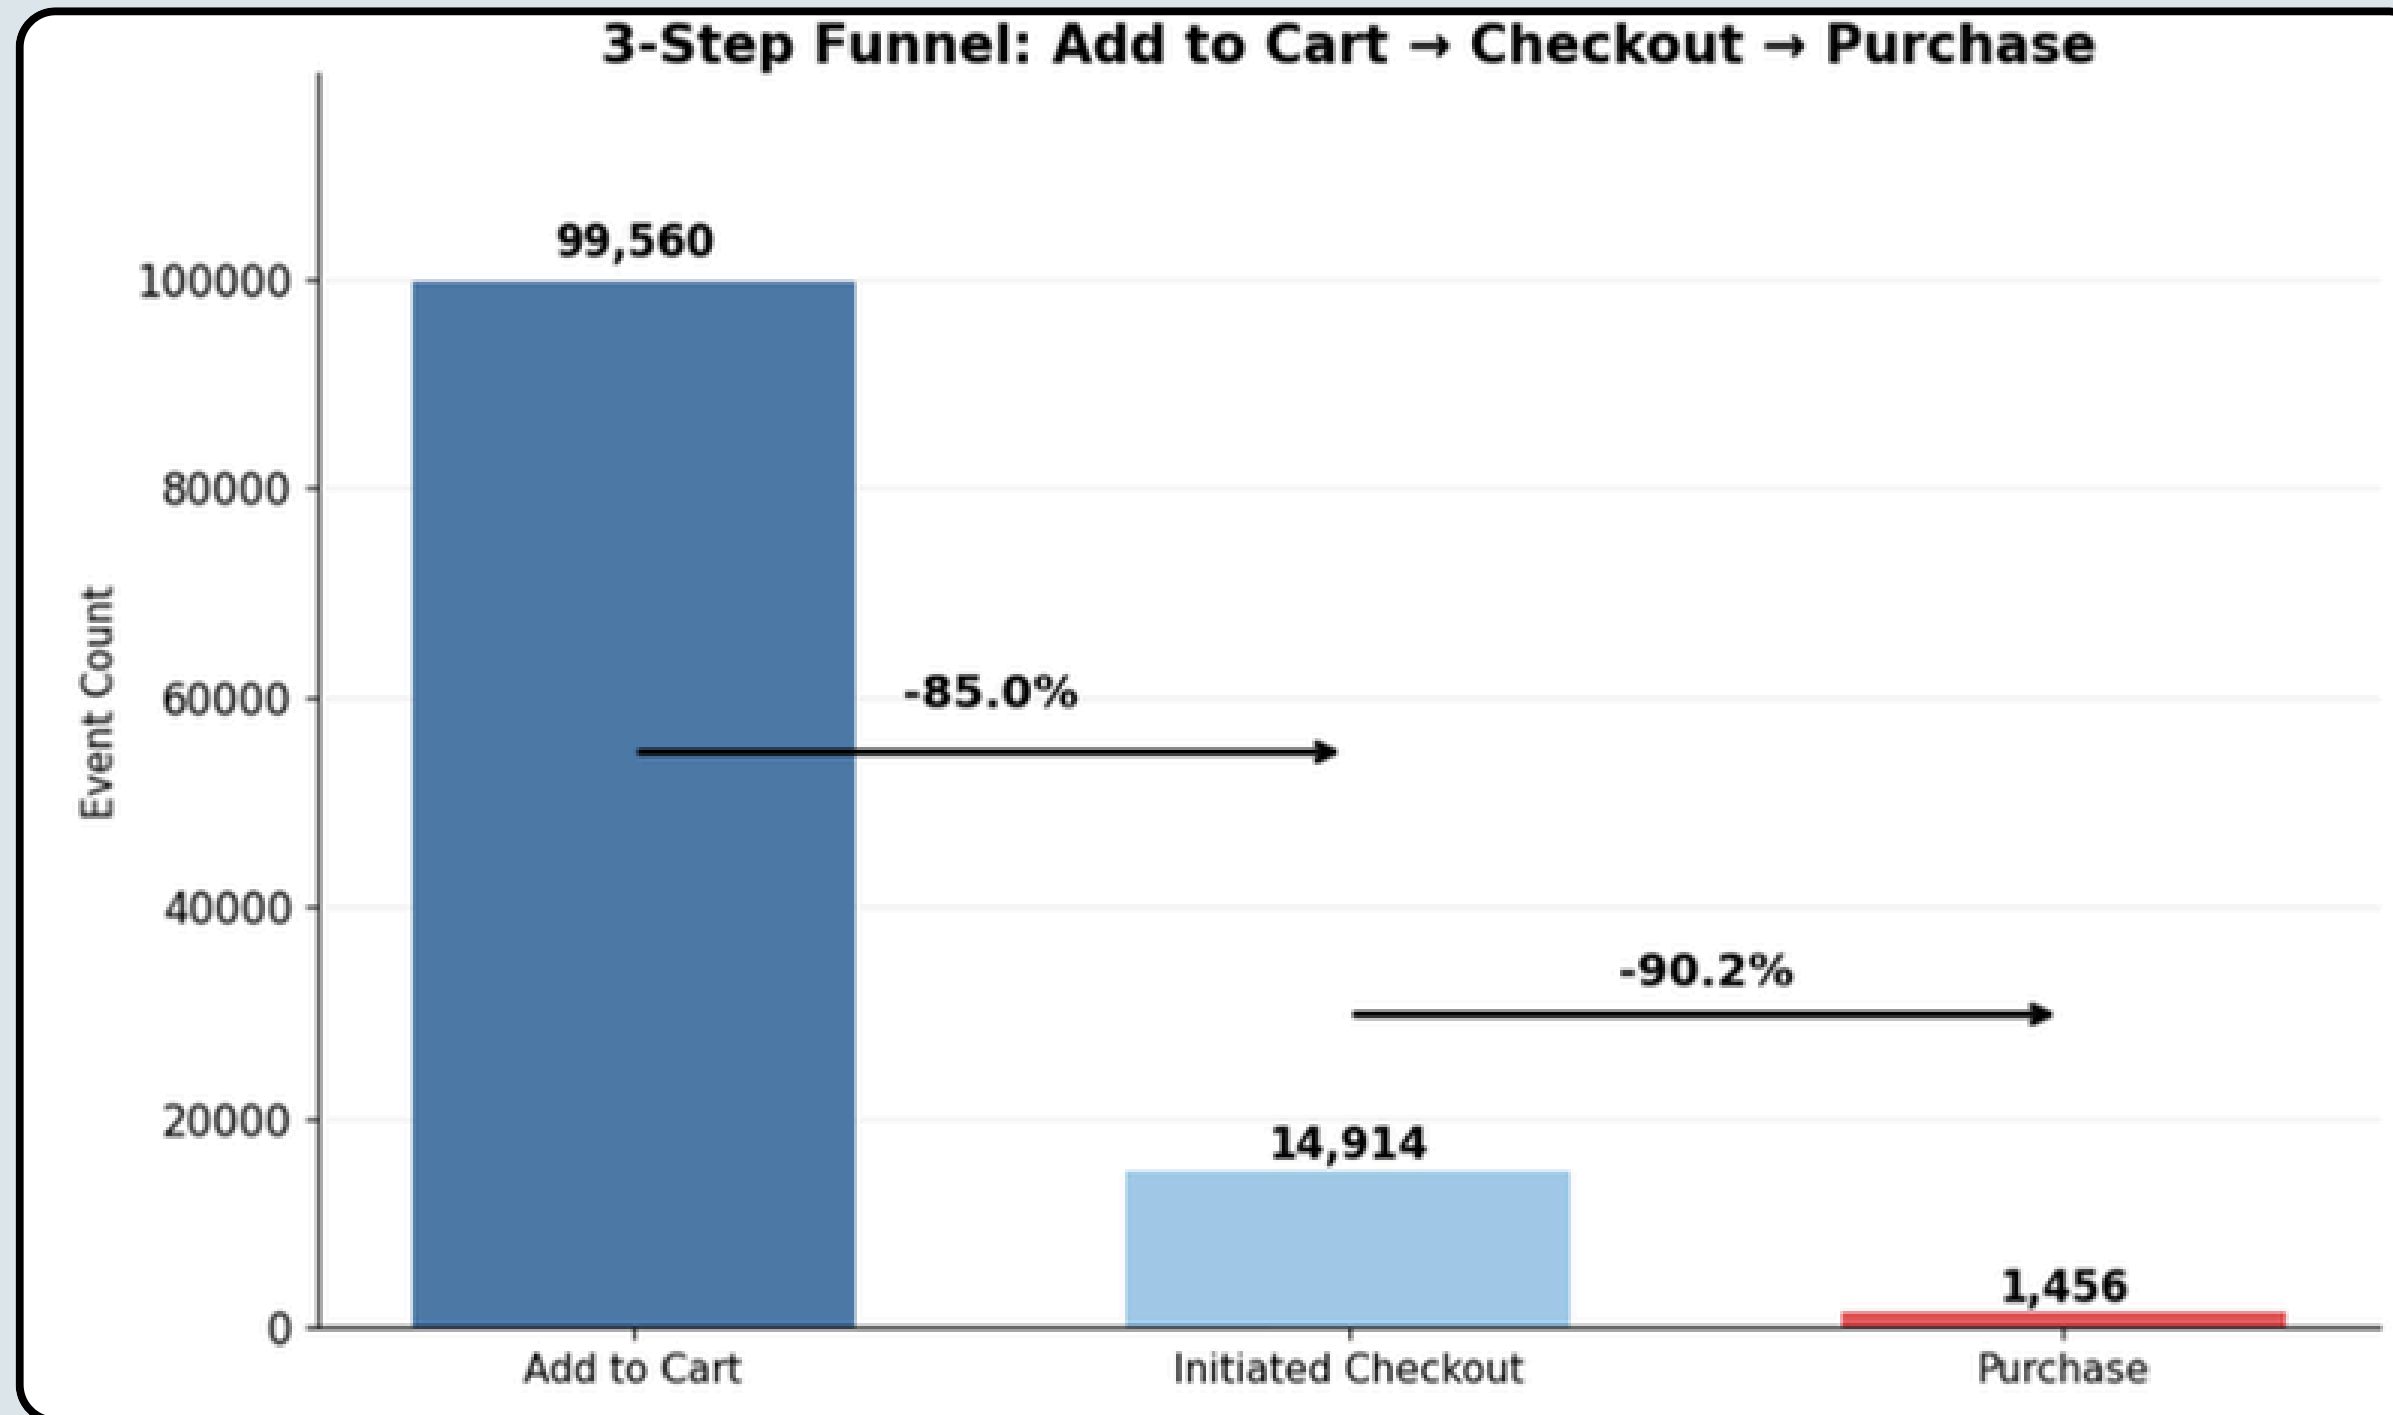

App 5 - Current Performance Snapshot (Jan-Jun 2025)

Initial App Snapshot - Geographic Distribution

App 5 - Current Performance Snapshot (Jan-Jun 2025)

High Product Interest, Low Purchase Conversion

App 5 – Current Performance Snapshot (Jan–Jun 2025)

Analysis Objective

Identify the key characteristics of purchasing users and use these insights to allocate resources more effectively and efficiently.

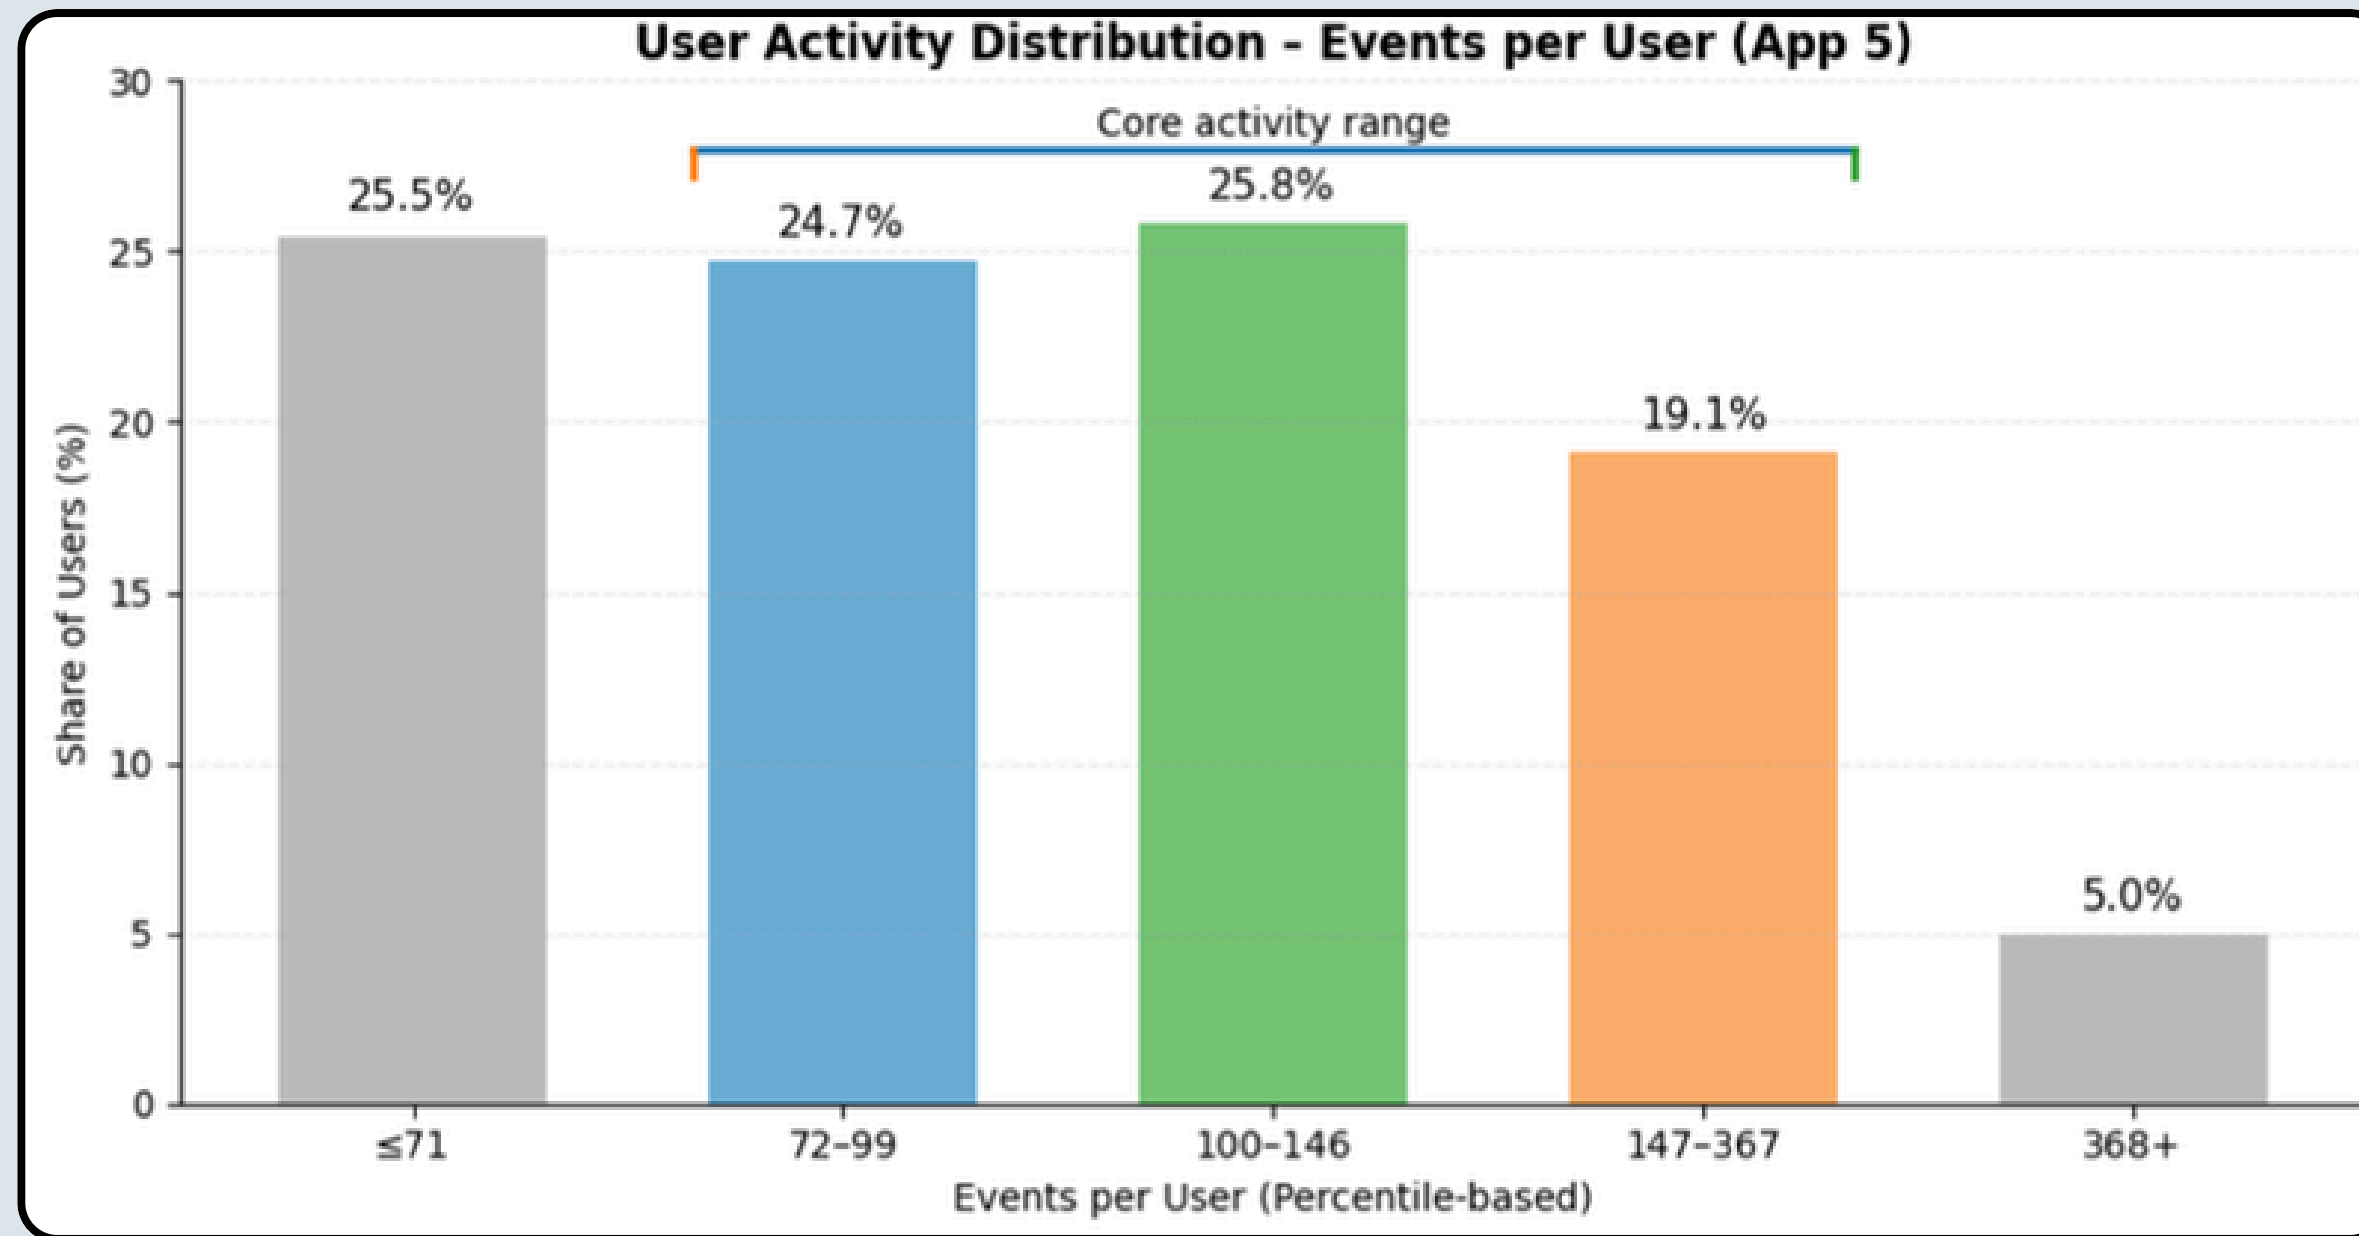

Research Questions

1. How active are users post-install?
2. What does the user journey look like?
3. Where and why do users drop off?
4. Where should we focus to increase revenue and profitability?

1.How active are users post-install?

- ~10K active users
- 927 (~9%) consistently active
- ~70% generated 72-367 events

Users remain active post-install

App 5 – Current Performance Snapshot (Jan-Jun 2025)

2.What does the user journey look like?

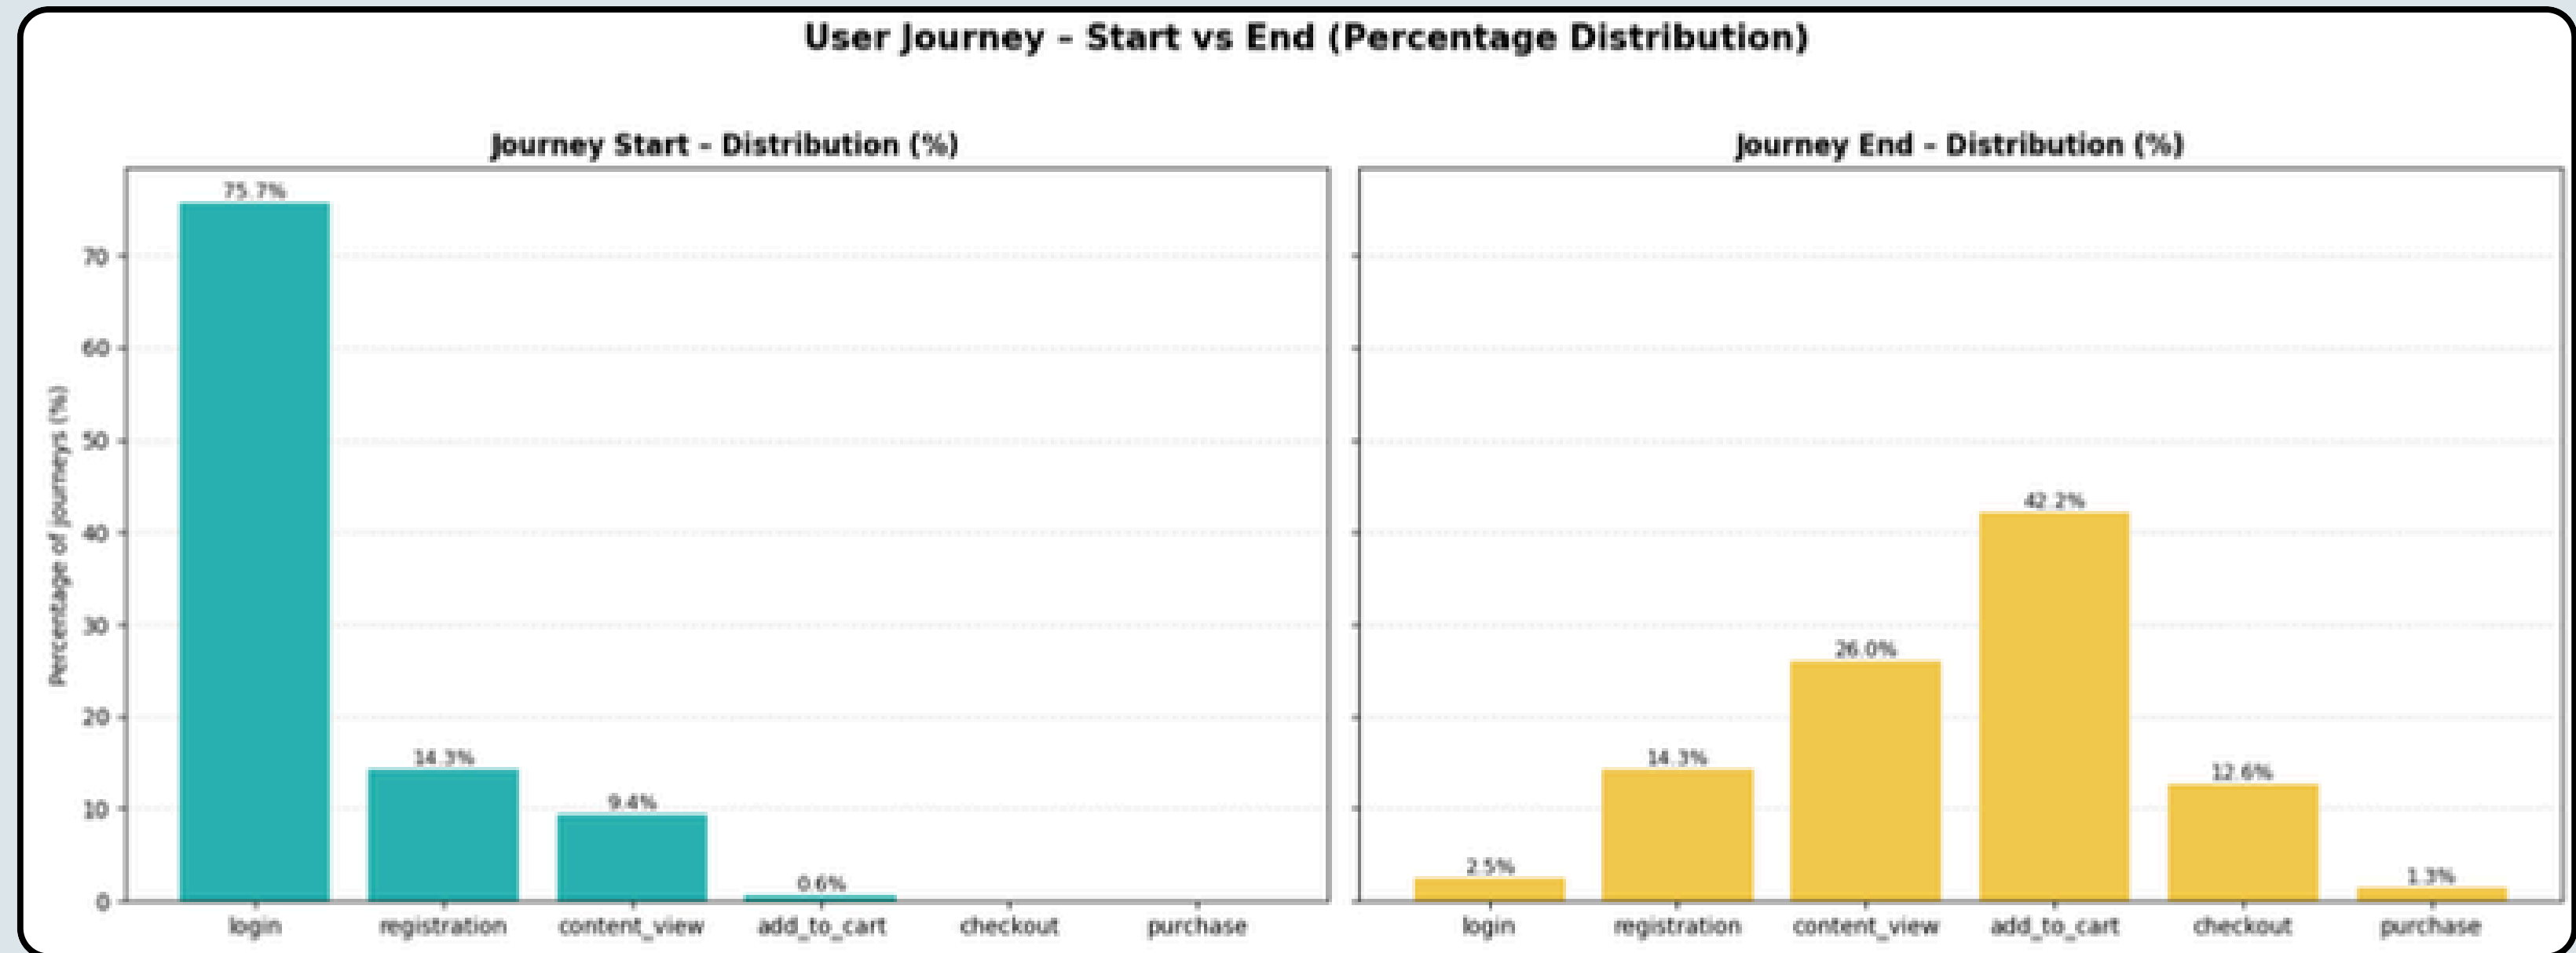

login	53,731
complete registration	10,000
content view	382,734
search	1196
add to wishlist	903
initiated checkout	14914
purchase	1456

no clear flow.

Can users browse the app and start a purchase journey without authentication?

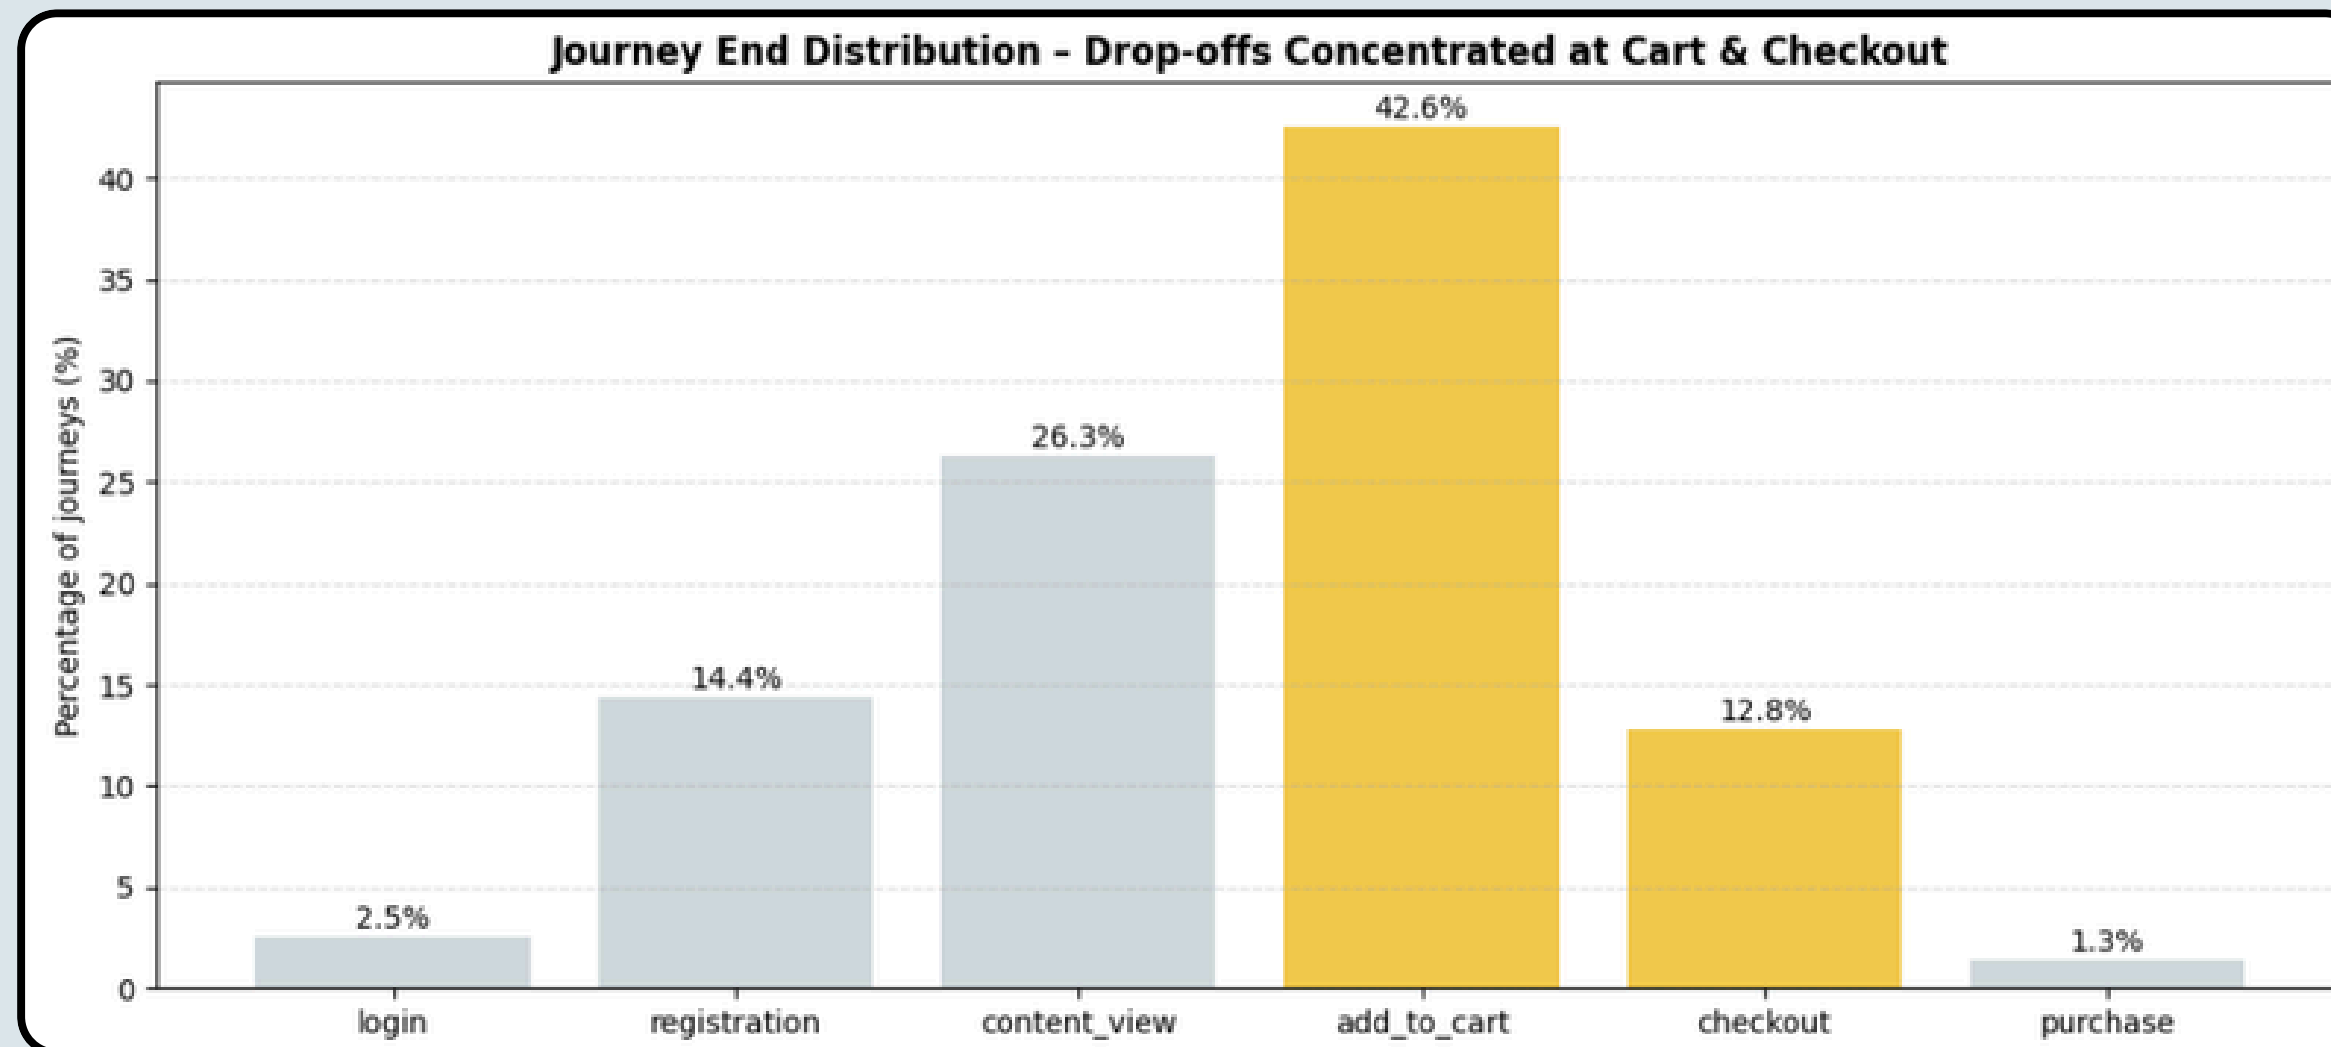

2.What does the user journey look like?

App 5 – Current Performance Snapshot (Jan-Jun 2025)

3. Where and why do users drop off?

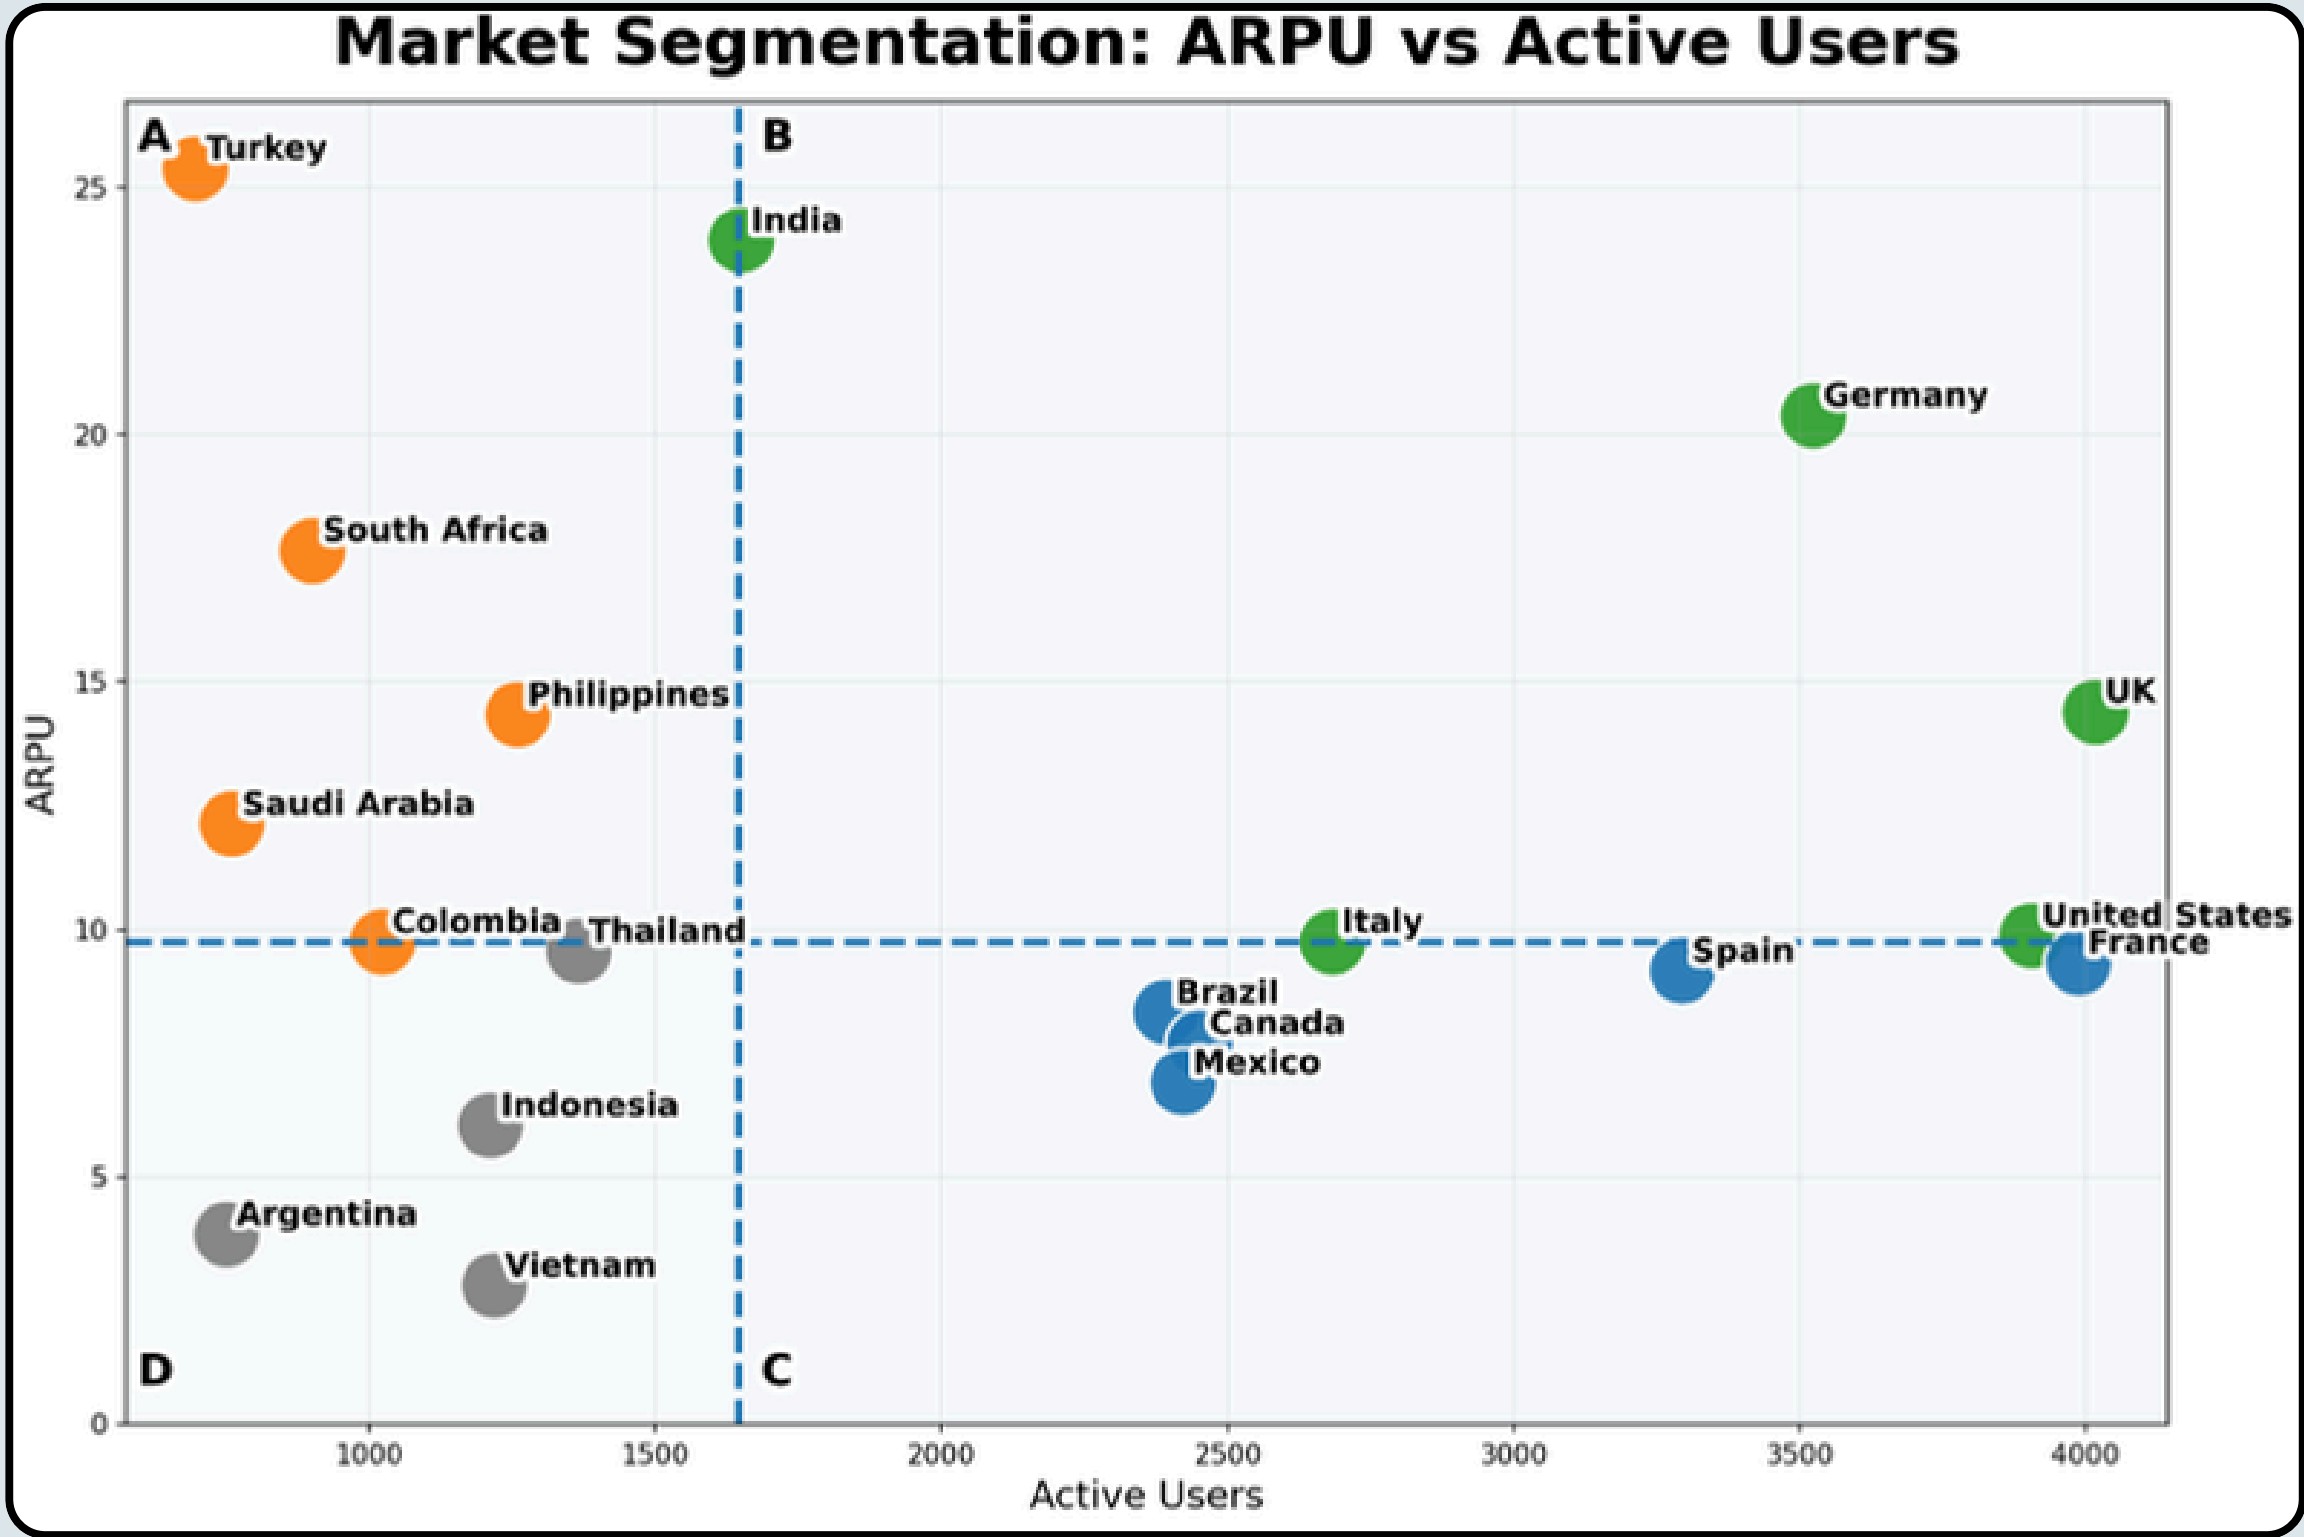

More than 55% of drop-offs happen at high-intent stages, just before purchase.

No significant differences between buyers and non-buyers.

App 5 – Current Performance Snapshot (Jan–Jun 2025)

4. Where should we focus to increase revenue ?

App 5 - Current Performance Snapshot (Jan-Jun 2025)

4.Where should we focus to increase revenue ?

Conclusions & Recommendations

Conclusions:

Two priority segments:

- High ARPU markets with low user scale and significant growth potential.
- Large user bases with strong ARPU and broad scale with proven profitability.

Recommendations:

- Scale Group A via proven high-ARPU channels to grow users without hurting profitability.
- In Group B, focus on retention, upsell, and funnel optimization to increase revenue per user.
- Allocate marketing budgets by ARPU, not by user volume.

Thank you
